

Over the years Lake Beauty has been running the life out of our 1988 Chevy 1 – ton dump truck that has served us well. We are at a point in its life right now where we need to decide what to do with it. The frame has rusted through and the hinges on the dump box have fallen apart. We do so much hauling with that truck that it is difficult to think of not having it around.

LBBC has found a truck that will serve the camp and be a great improvement. This new truck would bring us from a one yard dump box to a 5 yard box. It would move us from an underpowered 1988 truck to a well running 1994 GMC Top Kick with a snow plow, 2 speed rear axle and only 36,147 miles!

This would be a great truck for moving dirt, hauling fire wood, debris from projects and keeping our roads clean during the winter – this truck has everything we need to do that and do it with efficiency. First Covenant Willmar has come up with an idea of a campaign to raise the \$6500.00 for the truck. The campaign is called **“A Buck for the Truck.”** If every member of our 64 churches gave one dollar we would have all the funds we need to purchase this truck. It comes at a very critical point in the life of LBBC as we are in the middle of the Master Site Plan, looking at the future of LBBC, this is the time to get some equipment that would be able to do the work that is ahead of us.
